GDRFA- Dubai is keen to implement all practices related to sustainable procurement through providing the departments’ needs of goods, and services that have the lowest negative and the most positive, environmental, social and economic impacts.

GDRFA will work on achieving its Sustainable Procurement Policy, maintain natural, financial, and human resources as well as its social responsibility through:

1. Commitment to all laws and regulations as well as sustainability requirements and stakeholders’ needs.
2. Respect and appreciate all stakeholders involved in the supply chain, treat them honestly and integrity, take into consideration social and cultural diversity, behave ethically in accordance with the ethical standards and rules of conduct.
3. Provide clear and accurate information about the specification and details of the requested goods and services, promote fair competition among suppliers, respect their privacy, confidentiality of offers and property rights.
4. Assess and select suppliers on the basis of pre-defined criterion which ensure, equity while focusing on sustainability aspects (economic, society and environment).
5. Raise awareness and commitment of stakeholders towards sustainability issues and provide them with recommendations and solutions to enhance their performance toward sustainability.
6. Provide effective communication channels to enhance collaborative approach among all supply chain parties, as well as study of all suggestions and feedback provided to enhance sustainability.
7. Provide necessary requirements to maintain health and safety of employees, suppliers, & customers, and prevent hazards.
8. Support and enhance the national economy through increase purchases from new established and Small and Medium Sized Enterprises (SMEs) where applicable.

GDRFA – Dubai believes that the achievement of this policy comes through continuous improvement of the sustainability procurement system, setting objectives and review them periodically to ensure that the system is efficient and effective, improve the system based on learning and review cycle to meet new changes in the work environment.
